

Cover Ten

2.OA.B.2
1.OA.C.6 (Use materials)

Topic: Addition and Subtraction Facts

Object: Cover ten numbers.

Groups: Pairs

Materials for each group

- *Cover Ten* gameboard, p. 91
- Dot Cube (1–6), p. 144
- 10 counters

Tip By replacing the Dot Cube with a Number Cube, more children will be ready to try the more challenging games in this section.

Directions

1. In this game, a pair works cooperatively to cover numbers.
2. The pair rolls the Dot Cube and places it near the 6–9 number strip.
3. The pair adds or subtracts the rolled amount with any number on the number strip. The pair covers the resulting sum or difference with a counter.

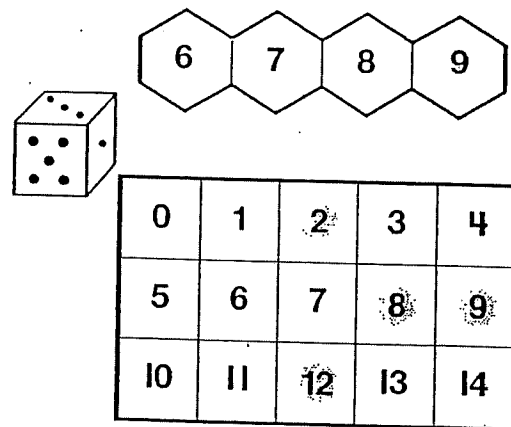

Example: If 3 is rolled, the pair may choose to subtract 3 from 8 and cover 5.

4. Each turn the pair discusses the various options in order to agree on where to place the counter.
5. Each member of the pair alternates turns, rolling the Dot Cube and covering the resulting amounts.
6. When the pair covers ten numbers with counters, the game ends.

Making Connections

Promote reflection and make mathematical connections by asking:

- Which amounts were easy to make?

Cubre diez

0	1	2	3	4
5	6	7	8	9
10	11	12	13	14
